01. AI Operational Intelligence Tool

02. CraveCaster: AI Meal App

✉ 12balaji.renu@gmail.com

ABOUT ME:

I am a Product Operations & Management professional with 3+ years of experience across logistics, product, and data analytics. Passionate about AI integration workflows, agent building, and technical products, with hands-on experience in data-driven decision-making, KPI tracking, experimentation, and cross-functional product delivery.

I excel at translating complex operational data into actionable insights and building AI-powered tools that make a measurable impact. I bridge the gap between engineering, data, and business, turning ideas into shipped products. I have a genuine passion for AI. I stay current with the latest developments, continuously upskill, and actively look for opportunities to build and experiment with new tools and technologies.

Currently at Delivery Hero SE, building AI-powered operational intelligence and automated product support workflows.

📍 Berlin, Germany

🎓 MSc Molecular Biology (HU Berlin) · GPA 1.3

🏆 Gold Medalist B.Eng · GPA 9.7/10

📄 Data Analytics Diploma

01. AI Operational Intelligence Tool

Building AI-powered operational oversight across 8 global markets

Objectives

Built an end-to-end AI operational intelligence system connecting live BigQuery KPI data to a Claude-powered engine. The tool automatically identifies regional anomalies, maps issues to country level, surfaces root cause analyses with confidence scores, and auto-escalates to relevant Slack stakeholders, collecting responses back into a unified UI.

Demoed to Directors and Senior Directors at Delivery Hero. Currently in staged implementation.

Claude (Anthropic)

BigQuery / SQL

Slack API

In Implementation: Delivery Hero SE

Key Questions

Which regions are underperforming against KPI targets?

What secondary metrics are driving the anomaly?

What is the root cause — with what confidence score?

Who needs to be alerted and what action is required?

■ DATA

Source: Delivery Hero BigQuery
Markets: 8 live operational KPIs
Metrics: GMV, conversion, failure rates

■ TOOLS

Claude · BigQuery / SQL
Slack API · Google Workspace · Python

■ SKILLS

Causal modelling · Anomaly detection
RCA generation · KPI dashboards
Slack workflow automation

02. CraveCaster

Cast your cravings into reality.

Objectives

A personal Flutter app built with Claude and Gemini, hosted on Firebase Studio. CraveCaster takes your mood, energy level, dietary preferences, available ingredients and cuisine choice, then generates a personalised meal with a full nutritional breakdown.

Features a gamified XP levelling system, step-by-step cooking mode, AI photo verification of completed dishes, and friend challenge leaderboards. Built and used personally every day.

Key Questions

What meal fits my mood, energy level and cravings right now?

Does this meal meet my nutrition goal with a full macro breakdown?

*Did I actually cook the right dish?
(AI photo verification)*

How do I earn XP and compete with friends on cooking challenges?

■ APP FEATURES

Mood & energy-aware meal suggestions
AI-powered food nutrition scoring
Step-by-step cooking mode
AI photo verification of dishes
XP levelling & friend challenges

■ TOOLS & STACK

Flutter · Claude (Anthropic)
Gemini CLI · Firebase Studio

From Craving to Cooked: Gamified

Set Context

Mood, energy,
diet, cuisine
& ingredients

AI Suggests

Claude & Gemini
generate meal +
nutrition + XP

Cook It

Step-by-step
cooking mode
guides you

Verify & Level

Upload photo,
AI confirms dish.
Earn XP or zero!

What I Build With

AI-Powered · Data-Driven · Shipped

AI & LLMs

- Claude (Anthropic)
- Gemini CLI
- ChatGPT Codex
- Agentic Workflows
- Prompt Engineering
- Notebook LM

Data & Analytics

- BigQuery / SQL
- Python
- Tableau
- Looker
- Causal Modelling
- A/B Experimentation

Product & Build

- Flutter / Firebase
- Slack API
- JIRA / Confluence
- Product Roadmapping
- KPI Frameworks
- Agile / Scrum

THANK YOU
